DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 15, 2004 has been entered.

Status of Claims

Claim 61 has been amended. Claims 1-74 are pending. Claims 1-60 are withdrawn from consideration as being drawn to a non-elected invention. Claims 61-74 are discussed in this office action.

Previous Rejections

2. The claim rejection under 35 USC 112 second paragraph is withdrawn in view of Applicant's amendment of the claim. The Claim rejection under 35 USC 102(e) is withdrawn in view of Applicant's amendment of claim 61.

New Ground of Rejections

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 61 and 63 is rejected under 35 U.S.C. 102(b) as being anticipated by Breyer et al (JBC, vol. 269, No. 8, pages 6163-69, Feb. 1994). Regarding claim 1, Breyer et al teach a oligonucleotide library comprising a plurality of oligonucleotides each including a unique sequence shared by a set of RNA spliced variants produced from a transcription unit transcribed in the transcriptome, wherein said unique sequence is selected that each oligonucleotide of said plurality of oligonucleotides hybridized to a set of RNA spliced variants produced from only one transcription unit of the transcriptome (abstract and page 6163 and 6164, sections entitled "RT-PCR and Ribonuclease Protection, see also page 6165 , Figure 1B).

Regarding claim 63, Breyer et al teach the oligonucleotide of claim 61, wherein the transcriptome is of a specific tissue (kidney) (see abstract). In view of the foregoing, Breyer et al meets the limitations of claims 61 and 63 of the instant invention.

4. Claims 61-74 are rejected under 35 U.S.C. 102(e) as being anticipated by Amitai et al (US 6625545 B1, filing date August 13, 1998). Regarding claim 61, Amitai et al an oligonucleotide library for detecting messenger RNAs of a transcriptome or a sub-transcriptome comprising a plurality of oligonucleotides each including a unique sequence shared by a set of RNA splice variants produced from a transcription unit transcribed in the transcriptome or a sub-transcriptome, wherein said unique sequence is selected such that each oligonucleotide of aid plurality of oligonucleotides hybridizes to a set of RNA splice variants produced from only one transcription of the transcription or the sub-transcriptome (col. 6, lines 17-31 and col. 9, lines 3-8 and col. 18, lines 44-47).

Art Unit: 1637

Regarding claim 62, Amitai et al teach the oligonucleotide library of claim 61, wherein the transcriptome is a human transcriptome (col. 22, lines 26-27).

Regarding claim 63, Amitai et al teach the oligonucleotide library of claim 61, wherein the sub transcriptome is a specific tissue (col. 5, lines 3-9 & 38-41).

Regarding claim 64-66, Amitai et al teach the oligonucleotide library of claim 61 and 64, wherein the sub-transcriptome is a pathological tissue, such a cancer tissue or tissue at different developmental stages (col. 22, lines 23-40).

Regarding claims 67 and 68, Amitai et al teach the oligonucleotide library of claims 61 and 67, wherein the transcriptome is derived from an individual suffering from a disorder, such as cancer (col. 22, lines 23-33).

Regarding claim 69-74, Amitai et al teach a DNA microarray (DNA chip) having attached thereof the oligonucleotide library of claim 61-65 and 67 (col. 23, line 42 to col. 24, line 55). Therefore, Amita et al meets the limitations of the claims 61-74 of the instant invention.
